

Legionella Testing and Sampling

Testing is an important part of maintaining a healthy water system and provides waterborne pathogen documentation.

Premier <u>Legionella</u> Testing and Sampling includes both Legionella specific testing as well as a percentage of sample locations being evaluated for a more comprehensive panel of pathogens. Commonly sampled sources include non-potable water from cooling towers, condensers, whirlpools and potable water from water distribution systems, water heaters and tanks, drinking fountains and ice machines. Once collected, samples are sent to an independent laboratory that has been an active infectious disease microbiology laboratory for approximately 20 years and has participated in the development of antimicrobial therapies for waterborne pathogens including, <u>Legionella</u> and has pioneered detection and control methodologies aimed at the prevention of Legionnaires' disease.

SAMPLE REPORT

Client Sample #: 1 Lab Sample #: 15000298-001

Sample Location: 8F

Test: 1015, Water Legionella Analysis, CDC Method
Results: Negative for Legionella at 10 days
Liquid Volume: 250 (mL)

Client Sample #: 2 Lab Sample #: 15000298-002

Sample Location: 5F

Test: 1015, Water Legionella Analysis, CDC Method
Results: Negative for Legionella at 10 days
Liquid Volume: 250 (mL)

Client Sample #: 3 Lab Sample #: 15000298-003

Sample Location: ER

Test: 1015, Water Legionella Analysis, CDC Method

Results: Negative for Legionella at 10 days

Liquid Volume: 250 (mL)

Client Sample #: 4 Lab Sample #: 15000298-004

Sample Location: OR

Test: 1015, Water Legionella Analysis, CDC Method

Results: Negative for Legionella at 10 days

Liquid Volume: 250 (mL)

ASHRAE 188-2015's goal is to specify a standard practice for use by facility managers/owners to prevent Legionellosis associated with building water systems. Partnering with Premier Water & Energy Technology, Inc. as part of your Water Management plan will reduce the risk of exposure to Legionella.

Please contact your Water Treatment Consultant for more information or to schedule Premier <u>Legionella</u> Testing and Sampling services.
