

COVID-19 Update

We continue to monitor the ongoing issues with the COVID-19 coronavirus and the challenges it creates for all of us. At Premier we continue to take a proactive position as it relates to the virus and recommended protocols. While the situation is fluid and uncertain, we thought a brief update about Premier's state of affairs would be useful.

- Premier Water & Energy Technology, Inc. is open and fully operational.
- We are encouraging all employees and partners to follow CDC-recommended hygiene guidelines.
- Our supply chain continues to function normally.
- We are monitoring Inventory delivery times to be impacted and have vetted additional sources for key raw materials.
- We are strategically maintaining elevated key inventory levels. Barring unforeseen circumstances, we have sourced sufficient inventory for several months.
- Our employees have been encouraged to stay home if they feel sick and seek medical attention, if needed. For our team members coming to the office, temperature checks are available at the door.
- Our leadership team is constantly monitoring and meeting regularly to review the situation.

At this time, you can expect us to continue to execute our routine service functions at your facility and to fully comply with any unique ingress/egress or work protocols you have deployed.

We continue to closely monitor the ongoing COVID-19 situation to ensure we take all necessary steps to protect the health and safety of our customers and employees. We are following Centers for Disease Control (CDC) and World Health Organization (WHO) guidelines, as well as guidance from federal, state and local officials, to make informed decisions.

Thank you for allowing us to partner with you. Please let me know if you have any questions.

Sincerely,

Thomas Brandvold
Premier Water & Energy Technology, Inc.
President
